

AIRPORT DOORS

Quality Door Solutions

Residential & Commercial
STEEL SECTIONAL DOORS

Reach the peak of your home's potential with Airport Doors' brilliant range of steel sectional garage doors.

Pinnacle Series

Quality, Durability & Style

Pinnacle Series steel sectional doors provide security, strength and reliable operation. This superior product range comprises numerous contemporary panel designs in a wide range of colours, allowing you to select the best door solution for your home.

Features

- 6 appealing designs
- Strong profile
- Easy to operate
- Optional windows

Colours

Pinnacle Series sectional doors are available in a variety of Colorbond® and powdercoat colours. Classic Cedar® and Caoba® “wood-look” colours (by Bluescope Steel) provide an outstanding and realistic alternative to real timber. Visit our website or ask your sales consultant for colour options.

Textures

Pinnacle Series doors are available in a unique coppertone texture (great for rendered exteriors) or woodgrain texture.

Window Designs (Optional)

Windows can be provided to add that special touch to your garage door and home, as well as a practical means of providing light into your garage.

Strength and Durability

Long-lasting oil-tempered springs, durable hinges and heavy-duty steel tracks provide the door with enduring strength and durability. Robust bracing is specially designed to suit door size and weight.

Smooth Performance

Strong nylon rollers with ball bearings decrease track noise whilst providing smoother operation during travel. This in turn reduces wear and increases the performance of your sectional garage door.

Bottom-Rail & Weather Seal

The strong aluminium extruded bottom rail is fitted with a durable PVC bottom weather-seal to overcome slightly uneven concrete and minimise rain and leaves coming into the garage. Where required (to suit opening height), an extended bottom-rail of 45mm profile will be used.

Operation

Sectional doors operate behind the opening (inside) in vertical and horizontal tracks. When fully open, the door rests parallel under the ceiling of your garage.

Warranty

Airport Door's steel sectional doors are manufactured to the highest quality and standards, and are covered by a 12 month warranty. For full warranty information consult the manufacturer.

Notes

- Oil canning is an inherent characteristic of sheet metal and although every endeavour is made to prevent oil canning, the process of roll forming sheet steel may cause irregularities. Oil canning does not decrease structural integrity.
 - Where products are in close proximity (within 1km) to corrosive environments e.g. industrial fallout or salt air, special care and maintenance are required to prolong the life of the product. Consult manufacturer for full warranty information.
 - Airport Doors reserves the right to make changes or improvements to products or accessories without notice and without obligation to make like changes or improvements to goods previously ordered.
 - Colorbond® is a registered trademark of Bluescope Steel Limited.
 - Whilst Bluescope Steel Limited is our preferred steel supplier, steel from other providers may also be used.
- © 2011 Czapp Pty. Ltd. trading as Airport Doors. ABN 27 257 135 008
